

Are Your Crop Input Costs Too High and Yields Too Low?

Hear the interview of
Charles Hinkebein
of Chaffee, MO

**Missouri Soybean
Association Contest Winner**

**World Record Holder for
Dryland Soybeans
109.32 bu/a**

1-507-726-3766, option 5**

Charles says that, *“what you put in the ground is what you’re going to get back. If you cut back on fertilizer and insecticides, fungicides and your micronutrients, don’t expect a whole lot back from that. It’s just what you put in is what you get back out.”*

Charles has been using Conklin products for over 7 years, but last year started using more of them. The results speak for themselves.

Congratulations, Charles, on a great yield!

AgroVantage[®] is a complete system for today’s crop production, emphasizing every key component from planting through harvest.
